

Cherry / Commerce Parking Structure

Grand Rapids, Michigan

The Cherry / Commerce Parking Ramp is located in downtown Grand Rapids, Michigan. The parking structure is a 313 space, 7 level facility immediately adjacent to an existing furniture store and extends over the street allowing access to the store at the garage level.

The exterior is covered with fancy precast concrete facade using smooth grey finish with cornices design to blend the structure with historic Downtown Grand Rapids. The west façade is a full height precast fire rated wall due to its proximity to the existing building.

Architect: Design Plus

Structural Engineer: Walker Parking Consultant

“The Cherry Commerce Parking Deck was under a tight schedule. The offsite casting of the precast panels ran concurrent with the deck pours so that once the deck pours were complete we simply erected the panels and had a finished product”.
